

Vinh Luu

Forward Deployed Engineer - Recruiting AI, Enterprise Integrations, Production Systems

Ho Chi Minh City, Vietnam | vinhluu.se@gmail.com | +84 795 795 595 | [linkedin.com/in/vinhluulinked](https://www.linkedin.com/in/vinhluulinked)

PROFESSIONAL SUMMARY

Lead Software Engineer at Zalo/VNG with 6+ years of software engineering experience across production systems, recruiting workflows, partner integrations, and business messaging. Current owner of Job Market on Zalo LifeService, a blue-collar recruiting product serving roughly 50k daily requests. Strong fit for Forward Deployed Engineer roles requiring customer discovery, system design, API integration, AI workflow design, stakeholder management, production debugging, and measurable business outcomes.

Keywords: Forward Deployed Engineer, enterprise AI agents, customer discovery, workflow mapping, technical workshops, system design, Java, React, Kafka, Redis, MySQL, Kubernetes, Dify, prompt design, KB-backed chatbot, API integration, guardrails, observability, stakeholder management, APAC, Vietnam.

CORE SCOPE FIT

- **Customer workflow to production:** Map users, recruiters, partners, source of truth, constraints, MVP scope, rollout path, and success metrics.
- **Enterprise AI deployment:** Apply prompt design, Dify workflows, KB-backed chatbot support, structured outputs, guardrails, and human escalation.
- **Integration and reliability:** Connect APIs, messaging systems, data flows, auth-constrained services, legacy systems, and partner workflows with fallback discipline.
- **Business outcome ownership:** Tie engineering decisions to lead send time, lead coverage, missed leads, onboarding speed, operational overhead, and reliability.

WORK EXPERIENCE

Zalo, VNG - Vietnam technology company; Zalo messaging and LifeService ecosystem Mar 2021 - Present

Lead Software Engineer - Job Market / LifeService Jul 2025 - Present

- **Own Job Market on Zalo LifeService**, a recruiting product for blue-collar hiring that connects Vietnamese job seekers with recruiters and labor-supply partners, serving roughly 50k daily requests.
- **Reduced operational overhead by 30%** by automating repeated manual actions and adding AI into product and delivery workflows for recruiting operations.
- **Improved partner onboarding by 40%** by creating chatbot support, KB-backed troubleshooting, and faster self-serve guidance when recruiters hit setup or usage issues.
- **Led stakeholder discovery and delivery** across recruiters, industrial-zone mass-hiring partners, labor-supply partners, Product, Ops, and Engineering.
- **Led a team of 4 engineers**, promoted 2 to senior, and standardized AI-assisted delivery practices while keeping senior review for high-risk production changes.

Senior Software Engineer - ZNS / Business Messaging Jul 2023 - Jul 2025

- **Built and operated previous ZNS/business messaging systems** supporting 30M+ user surfaces and millions of daily business-to-user messages.
- **Developed API and integration paths** for enterprise messaging workflows across partner systems, delivery behavior, troubleshooting, and reliability constraints.
- **Improved peak-traffic stability** across core ecosystem applications through caching, graceful degradation, clearer operational ownership, and performance tuning.

Software Engineer Apr 2022 - Jul 2023

- **Converted ambiguous requirements** into backend service flows and product behavior across business, product, and engineering stakeholders.
- **Improved resource efficiency by 25%** by migrating legacy services toward cleaner service boundaries without user-visible downtime.
- **Supported SOX-compliant reporting/billing workflows** with auditable ownership boundaries and cross-team coordination.

Associate Software Engineer Mar 2021 - Apr 2022

- **Improved business workflow performance** by converting raw user and business requirements into services and latency-focused redesigns using Redis, Kafka, SQL, and NoSQL systems.

FPT Software

Sep 2019 - Aug 2020

Software Engineer - Intern/Contract

Sep 2019 - Aug 2020

- **Built automated ETL pipelines** that consolidated disparate data sources into business intelligence for internal and partner-facing analytics.
- **Authored third-party integration guides** for partner portals, reducing onboarding friction for external engineering teams.

TECHNICAL SKILLS

AI workflows: Prompt design, Dify workflows, KB-backed chatbot support, structured outputs, content classification, human escalation, guardrails.

Backend and distributed systems: Java, React, REST APIs, microservices, Redis, Kafka, MySQL, SQL/NoSQL, high-throughput messaging, data flows.

Production engineering: Observability mindset, trace-driven debugging, latency tuning, caching, fallback paths, rollback planning, runbooks, incident communication.

Enterprise integration: API design, data mapping, auth constraints, partner onboarding, technical documentation, technical workshops, stakeholder alignment.

Infrastructure exposure: Kubernetes in production environments with support from Site Operations teams.

Market and language: Native Vietnamese, professional English, Vietnam/APAC digital platform and recruiting-market context.

PERSONAL SKILLS

Customer-facing communication: Translate technical tradeoffs for recruiters, partner engineers, product owners, operators, and business stakeholders.

Ambiguity decomposition: Turn unclear operational pain into workflow maps, assumptions, constraints, MVP scope, and measurable success criteria.

Ownership and project management: Manage expectations, timelines, delivery risks, stakeholder updates, and post-launch iteration.

Mindful collaboration: Listen carefully, stay calm under pressure, negotiate with empathy, and build trust across teams and cultures.

EDUCATION

Bachelor's Degree in Software Engineering, FPT University - Ho Chi Minh City

Sep 2016 - Dec 2020

70% merit scholarship. Capstone: traffic violation detection from surveillance cameras using computer vision.

Gifted High School Diploma, Le Quy Don Gifted High School - Da Nang

Jun 2013 - May 2016

HONORS AND AWARDS

VNG 1st Runner Up - MiniApp Building Hackathon.

Zalo 2nd Runner Up Finalist - ZA Challenge.

FPT Software Best BU Intern Performance @ FSG.

FPT University Honorable Students Award.

Silver Medal - April 30th Olympic for Gifted Students.

First Prize - Software Programming Provincial Merit Competition.
